Team Formation Activities Groups

The following list is only for the class activity only although some thoughts have been given for this particular choice.

- Shihong Li, Steven Su, Jing Huang, Hua Hua, Du Yu,
- Joyce Tan, Danni Tang, Yen Theng Tan, Yue Wu, Rong Fan,
- Jordan Mandel, Zhenhan Zhao, Jonathan Ho, Yixuan Da, Du Yu
- Zichan Wang, Michael Weinberger, Shannon Cebon, Zhendan Zhu
- Ahmed Aly, Tianyu Luo, Huinan Zhang, Xiaohan Yang

Getting to Know Your Class Activity Group

Locate the group members and then do the following:

- Someone should volunteer to keep the meeting organized,
- Get to know your groupmates' name and their favorite non-academic activities,
- Give an overview of your project idea with your teammates,
- Discuss what you think the “strength/advantage” of your project,
- Figure out if all of you can meet at a certain time if needed.

Appropriately, summarize your findings in the back of this paper.

Deciding on Your Class Project Team

By the end of today's lecture, you should decide on your course of action. You have three potential options:

- Stick with your current group assignment,
- Form a new team,
- Be your own team.

Your instructor has the final say on your class project team and the team project. If you want to go alone, then your project must be approved by the instructor. If your project is not approved, then you must join another team in order to complete the course. Write down your decision in the back of this paper. Once approved by your instructor, *each* of you should post your teams in *your own thread* in the designated Blackboard forum.
